

Amendments to the Claims:

Please amend claims 31, 32, 39-41 and 47-49 as follows, and add new claims 50-69. This following listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-30 (previously canceled)

31. (currently amended): A method for presenting Internet content to a user of a computing device, comprising:

retrieving a first Internet content that is programmed in a format readable by a Web browser program; and

rendering the first Internet content to produce a visual manifestation of the first Internet content on an output means of the computing device, wherein the visual manifestation of the first Internet content is not confined by a window of a Web browser program, wherein the first Internet content comprises a definition of a frame for the visual manifestation.

32. (currently amended). The method of claim 31, wherein ~~the first Internet content comprises a definition of a frame for the visual manifestation~~ the definition of the frame is programmed in a format readable by a Web browser program.

33. (previously presented): The method of claim 31, further comprising:

retrieving a second Internet content that is programmed in a format readable by a Web browser program; and

rendering the second Internet content to produce a second visual manifestation of the second Internet content on the output means of the computing device, wherein the second visual manifestation of the second Internet content is not confined by a window of a Web browser program.

34. (previously presented): The method of claim 33, wherein the second Internet content comprises a definition of a frame for the second visual manifestation.

35. (previously presented): The method of claim 31, wherein the first Internet content comprises XML codes.

36. (previously presented): The method of claim 35, wherein the definition of the frame comprises XML tags.

37. (previously presented): The method of claim 31, wherein the first Internet content comprises JavaScript codes.

38. (previously presented): The method of claim 37, wherein the definition of the frame comprises JavaScript tags.

39. (currently amended): The method of claim 31, wherein the ~~first Internet content comprises codes for creating a visual manifestation of a calculator~~ rendering step comprises rendering the first Internet content to produce a visual manifestation of a calculator on an output means of the computing device, wherein the visual manifestation of the calculator is not confined by a window of a Web browser program, wherein the first Internet content comprises a definition of a frame for the visual manifestation of the calculator.

40. (currently amended): The method of claim 31, wherein the ~~first Internet content comprises codes for creating a visual manifestation of a media player~~ rendering step comprises rendering the first Internet content to produce a visual manifestation of a media player on an output means of the computing device, wherein the visual manifestation of the media player is not confined by a window of a Web browser program, wherein the first Internet content comprises a definition of a frame for the visual manifestation of the media player.

41. (currently amended): The method of claim 31, wherein the ~~first Internet content comprises codes for accessing streaming media from a specified address~~ rendering step comprises rendering the first Internet content to produce a visual manifestation of a means of accessing streaming media on an output means of the computing device, wherein the visual manifestation of the means of accessing streaming media is not confined by a window of a Web browser program, wherein the first Internet content comprises a definition of a frame for the visual manifestation of the means of accessing streaming media.

42. (previously presented): A method for presenting Internet content to a user of a computing device, comprising:

receiving Internet content, wherein the Internet content is programmed in a format readable by a Web browser program;

determining that the Internet content includes a definition for a frame that surrounds a first visual manifestation for the Internet content;

based on at least in part the frame definition, constructing a second visual manifestation of a frame through which the first visual manifestation is presented; and

displaying the first visual manifestation and the second visual manifestation on an output device of the computing device.

43. (previously presented): The method of claim 42, wherein said receiving step comprises receiving the Internet content from the World Wide Web.

44. (previously presented): The method of claim 42, wherein said receiving step comprises retrieving the Internet content from a memory of the computing device.

45. (previously presented): The method of claim 42, wherein the Internet content comprises XML codes.

46. (previously presented): The method of claim 42, wherein the Internet content comprises JavaScript codes.

47. (previously presented): The method of claim 42, wherein the ~~first Internet content comprises codes for creating a visual manifestation of a calculator~~ rendering step comprises rendering the first Internet content to produce a visual manifestation of a calculator on an output means of the computing device, wherein the visual manifestation of the calculator is not confined by a window of a Web browser program, wherein the first Internet content comprises a definition of a frame for the visual manifestation of the calculator.

48. (previously presented): The method of claim 42, wherein the ~~first Internet content comprises codes for creating a visual manifestation of a media player~~ rendering step comprises rendering the first Internet content to produce a visual manifestation of a media player on an output means of the computing device, wherein the visual manifestation of the media player is not confined by a window of a Web browser program, wherein the first Internet content comprises a definition of a frame for the visual manifestation of the media player.

49. (previously presented): The method of claim 48, wherein the ~~first Internet content comprises codes for accessing streaming media from a specified address~~ rendering step comprises rendering the first Internet content to produce a visual manifestation of a means of accessing streaming media on an output means of the computing device, wherein the visual

manifestation of the means of accessing streaming media is not confined by a window of a Web browser program, wherein the first Internet content comprises a definition of a frame for the visual manifestation of the means of accessing streaming media.

50. (new): A method for presenting Internet content to a user of a computing device, comprising:

retrieving data that is programmed in a format readable by a Web browser program, the data comprising content data and a definition that defines at least in part a user interface with which the content data is presented; and

presenting a manifestation of the content data to the user, wherein the manifestation is not confined by a window of a Web browser program.

51. (new): The method of claim 50, wherein the presenting step comprises presenting a visual manifestation of the user interface, wherein the visual manifestation of the user interface is not confined by a window of a Web browser program.

52. (new): The method of claim 50, wherein the definition defines at least in part a functionality available to the user to control presentation of the content data.

53. (new): The method of claim 50, wherein the data is provided by a content developer.

54. (new): The method of claim 53, wherein the definition of the user interface and the functionality available to the user to control presentation of the content data is provided by the content developer.

55. (new): The method of claim 50, wherein the content data is provided by a first entity, and wherein the definition of the user interface and the functionality available to the user to control presentation of the content data is defined by a second entity.

56. (new): The method of claim 50, wherein the definition defines at least in part a user interface through which the manifestation of the content data is presented.

57. (new): The method of claim 56, wherein the definition comprises JavaScript codes that define the user interface through which the manifestation of the content data is presented.

58. (new): The method of claim 57, wherein the definition comprises JavaScript codes that define a control button and a control functionality of the control button.

59. (new): The method of claim 58, wherein the definition comprises JavaScript codes that define a play button, wherein the play button is configured to allow the user to control the playback of the manifestation of the content data upon selection thereof.

60. (new): The method of claim 50, wherein the retrieving step comprises retrieving the data from the World Wide Web.

61. (new): The method of claim 50, wherein said retrieving step comprises retrieving the data from a memory of the computing device.

62. (new): A method for presenting Internet content to a user of a computing device, comprising:

retrieving data programmed in a format readable by a Web browser program;

determining that the data comprises content data and a definition that defines at least in part a user interface with which the content data is presented and at least in part a functionality available to a user to control presentation of the content data;

based on at least in part the definition, displaying the user interface with which a visual manifestation of the content data is presented, wherein the user interface comprises a selectable

option corresponding to the functionality available to the user, wherein the visual manifestation of the content data and the user interface is not confined by a window of a Web browser program; and

in response to a user input selecting the selectable option, altering the visual manifestation of the content data.

63. (new): The method of claim 62, wherein the data is provided by a content developer.

64. (new): The method of claim 63, wherein the functionality available to the user to control presentation of the content data is defined by the content developer.

65. (new): The method of claim 62, wherein the content data is provided by a first entity, and wherein the functionality available to the user to control presentation of the content data is defined by a second entity.

66. (new): The method of claim 62, wherein the definition comprises JavaScript codes that define the user interface through which the manifestation of the content data is presented.

67. (new): The method of claim 66, wherein the definition comprises JavaScript codes that define a play button configured to allow the user to playback the manifestation of the content data upon selection thereof.

68. (new): The method of claim 62, wherein said retrieving step comprises retrieving the data from the World Wide Web.

69. (new): The method of claim 62, wherein said retrieving step comprises retrieving the data from a memory of the computing device.
